Web Developer and IT Support Specialist

Proven Web Developer and IT Support Specialist with a track record of transforming applications for mobile-friendly use and producing multi-browser compatible websites at SkyIT. Expert in React js and adept at problem-solving, I excel in fast-paced Scrum environments, significantly enhancing project outcomes. Additionally, I provide top-notch IT support, ensuring seamless user experiences and resolving technical issues efficiently. Committed to continuous learning and applying best practices in software design.

Willing to relocate: Anywhere

Work Experience

Full stack Web Developer

Saint Spark-Remote

August 2024 to Present

• Developed and optimized a dynamic Learning Management System (LMS) using Next.js for the frontend and Node.js for the backend, ensuring scalability, responsiveness, and cross-platform compatibility.

• Implemented multiple workflows, enhancing user experience and streamlining content delivery for students and instructors.

• Collaborated in code reviews, problem-solving sessions, and peer programming, leading to improved code quality and faster project completion.

• Utilized Git and GitHub for version control and project management, ensuring smooth team collaboration and integration.

• Stayed updated with industry best practices, continuously improving skills and incorporating new technologies to enhance project outcomes.

IT support

LexTech Ecosystem Limited-Lagos

August 2023 to Present

• Provided timely and effective assistance to clients resolving technical issues with legal tech products via phone, email, and remote access.

• Developed and maintained in-depth knowledge of legal tech solutions to accurately address client inquiries and deliver informed support.

• Facilitated client onboarding, training, and product feature guidance for optimal usage of the Icaseflow a legal tech software .

• Created and updated user guides, FAQs, and training materials to enhance client understanding.

• Identified, analyzed, and resolved technical issues related to software functionality, user errors, and system integration.

• Gathered client feedback and collaborated with the development team to address recurring issues and inform product improvements.

• Maintained detailed records of client interactions, technical issues, and resolutions to track recurring problems and drive continuous improvement.

Frontend engineer

Starttel Tech-Remote

August 2024 to January 2025

• Designed and developed a dynamic, high-performance web application using React and JavaScript, implementing Framer Motion for smooth animations and enhanced user interactions. Built reusable UI components, ensuring responsiveness, cross- browser compatibility, and accessibility following WCAG standards and modern UX principles.

• Integrated RESTful APIs for real-time data updates, optimized state management using Context API or local state, and improved app efficiency with lazy loading and code- splitting. Ensured seamless frontend-backend communication and implemented secure authentication for user access.

• Conducted code reviews, performance optimizations, and debugging, reducing UI-related issues by 40%. Collaborated with designers to convert Figma prototypes intopixel-perfect UIs, implemented smooth page transitions with Framer Motion, and contributed to an Agile development workflow for faster feature delivery.

Full-Stack Engineer Freelancer

Upwork

April 2024 to July 2024

• Pharmacy Store Development: Built a fully functional online pharmacy store using theMERN stack (MongoDB, Express.js, React, Node.js), integrating features such as product categorization, search filters, user authentication, and a seamless checkout process

• Summer BootCamp App: Developed a custom web application for a client's Summer BootCamp, enabling student registrations, course management, and real-time notifications for schedule updates.

• Designed and implemented RESTful APIs for smooth communication between frontend and backend, ensuring a fast and secure experience

Web Developer

Sky IT-Warri

June 2021 to July 2023

• Collaborated with stakeholders during development processes to confirm creative proposals and design best practices.

• Contributed to projects within Scrum project management environments.

• Transformed native applications into mobile-friendly products.

• Produced websites compatible with multiple browsers.

• Leveraged Git and GitHub for version control and project management, ensuring efficient collaboration and integration across development teams.

• Engaged in ongoing learning and professional development, staying updated with industry standards to continuously enhance skills and project outcomes

Intern Software Developer

National institute for information technology-NG

March 2022 to November 2022

• Analyzed source code to identify functionality issues.

• Brainstormed with engineering team to determine appropriate code testing processes.

• Proofread technical documentation and user manuals.

• Developed reports using SQL server reporting services.

• Partnered with team members to learn best practices in software design.

Education

Bachelor's of science degree in computer science

Edo state university uzairue

October 2019 to August 2023
